

十五、让你的数据变得规律

web scraper 数据存储方式

Local storage —— 无序

CouchDB —— 有序

CouchDB 安装

CouchDB-mac
CouchDB-windows-64
CouchDB-windows-32

CouchDB 配置

浏览器地址栏输入：http://127.0.0.1:5984/_utils/

The screenshot shows the CouchDB Fauxton web interface. The browser address bar displays `127.0.0.1:5984/_utils/`. The main content area is titled "Databases" and contains a table with the following data:

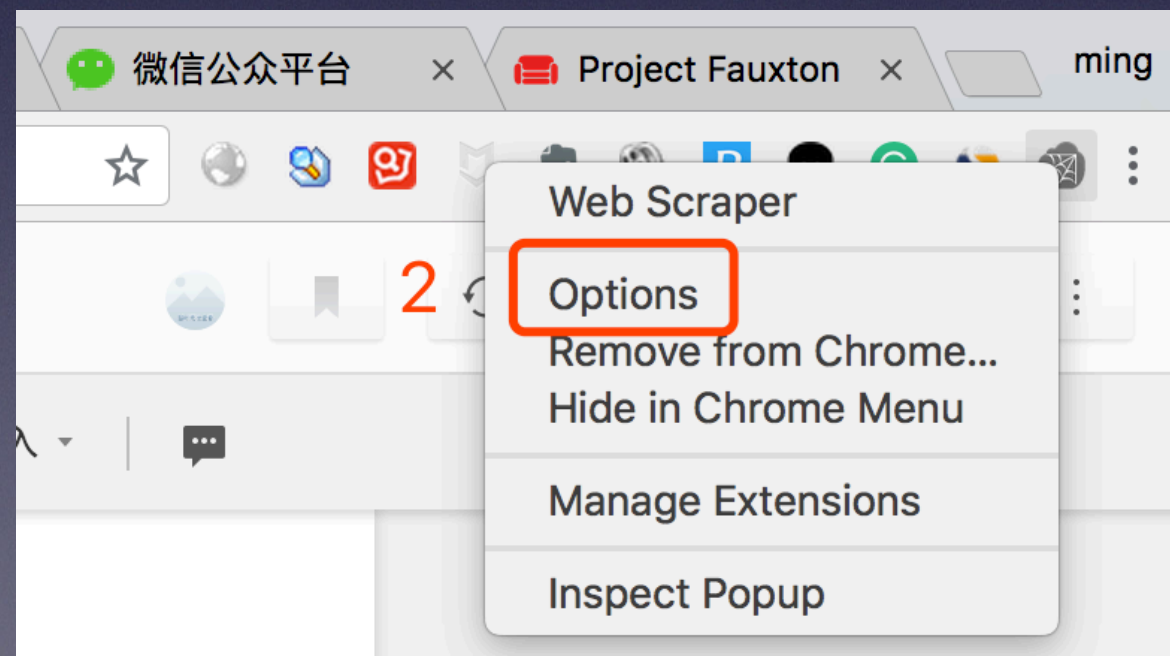

Name	Size	# of Docs
scraper-sitemaps	0.9 KB	1
sitemap-data-aaaa	5.2 KB	20

On the right side of the interface, a "Create Database" modal is open. The modal has a text input field labeled "Name of database" and a red "Create" button. Red annotations are present: a red box labeled "1" around the "Create Database" button in the top right; a red box labeled "2" around the "Name of database" input field; and a red box labeled "3" around the "Create" button in the modal.

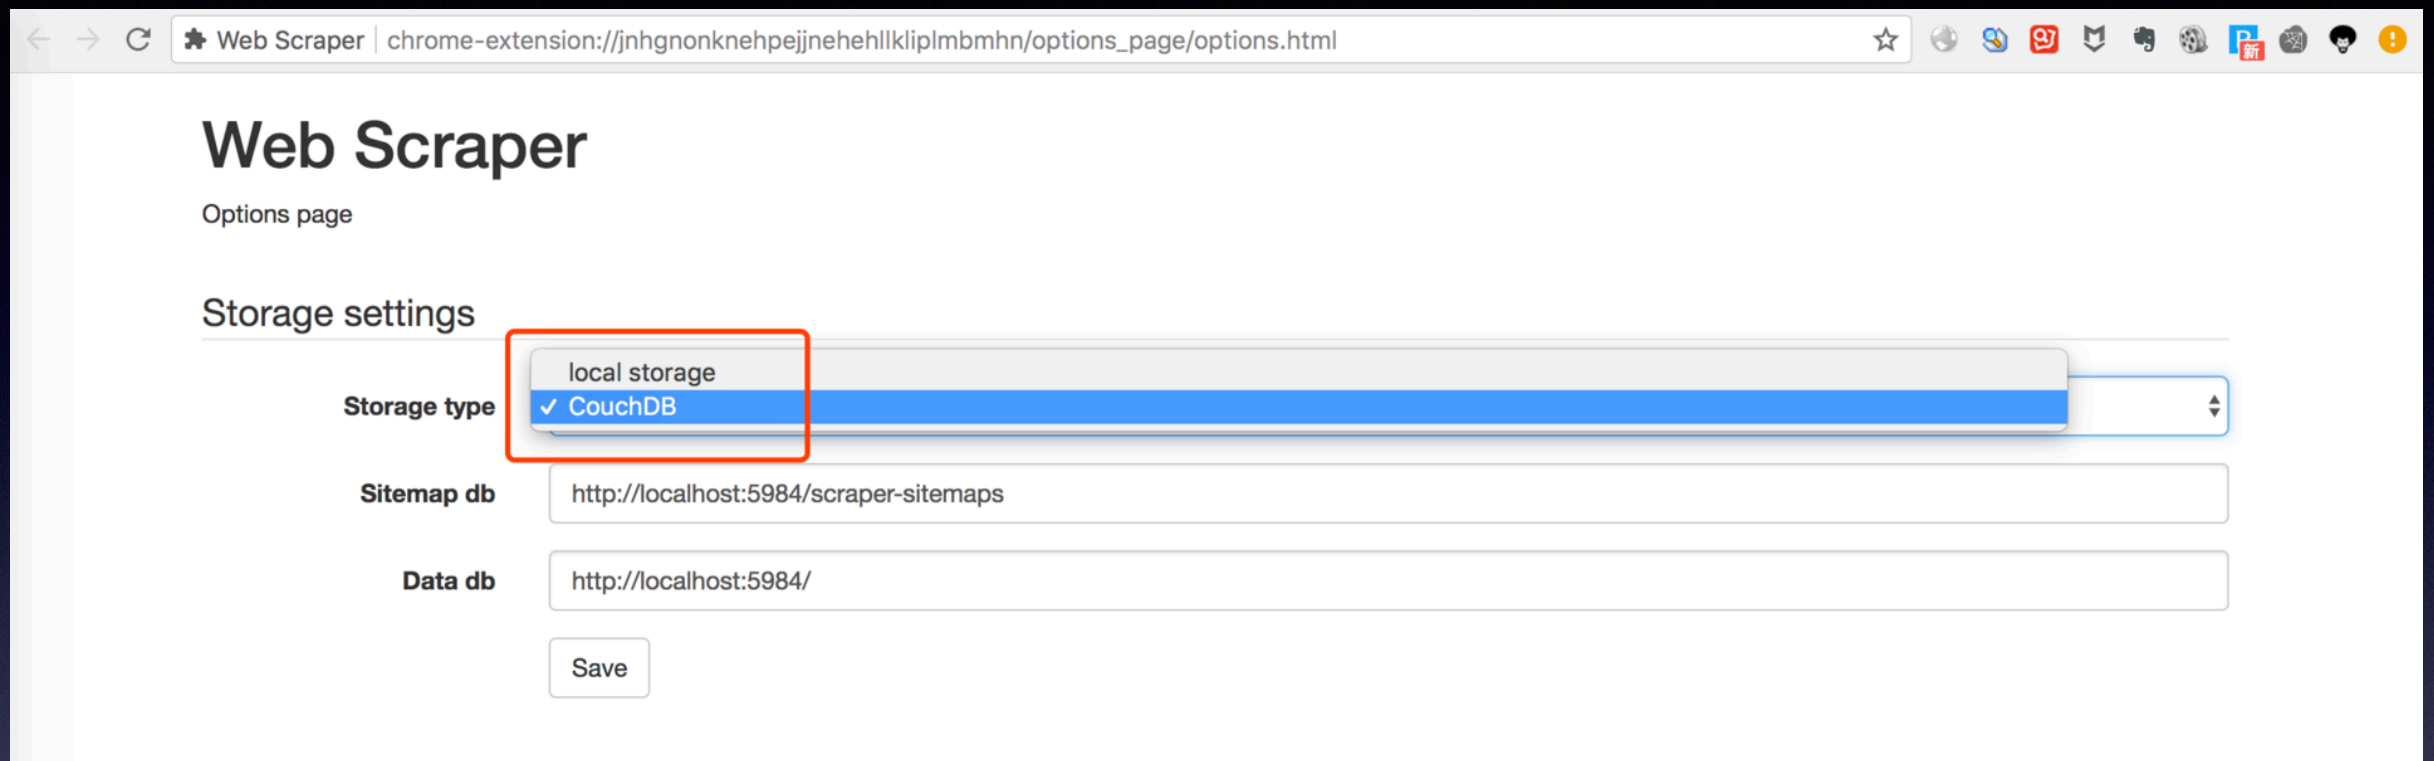

At the bottom right of the interface, it says "Showing 1-2 of 2 databases." with pagination controls.

2、scraper-sitemaps

web scraper 配置 (1)

web scraper 配置 (2)

Storage type: CouchDB

Sitemap db: <http://localhost:5984/scraper-sitemaps>

Data db: <http://localhost:5984/>

点击“Save”后可能没反应，其实已经生效，关闭页面即可。

重启浏览器

创建 sitemap 没反应

原因： CouchDB 程序未打开

解放方案： 打开 CouchDB，重启浏览器

sitemap 不见了

忘掉你装了 CouchDB
