设置Selector

The image shows a screenshot of the IT桔子 (IT Guazi) website and its Web Scraper interface. The website is a platform for discovering companies and investment opportunities. The Web Scraper interface is used to configure selectors for scraping data from the website.

Website Interface:

- Header: IT桔子, 首页, 雷达, 会员, 数据服务, 活动, 更多, 创业公司、投资机构...
- Navigation: 发现新公司 (83263), 投资速递 (38021), 投资机构 (6682), 创投人物 (78122), 行业报告 (9174), 专辑 (462), 新闻 (67354), 千里马 (510), 孵化器 (113), 基金 (34413), 公司点评 (8573).
- Search Results: 你正在搜索 “英语”, 共找到 597 条结果. Results include 星际英语 (Star English) and 袋鼠英语 (Kangaroo English).

Web Scraper Interface:

- Id:** company (1)
- Type:** Element click (2)
- Selector:** Select (3), Element preview, Data preview, a h4
- Click selector:** Select (4), Element preview, a.act-searchloadmore
- Click type:** Click more (click to load more elements. Stops when no new elements with unique text content are found.) (5)
- Click element uniqueness:** unique CSS Selector (6)
- Multiple:** ☒ Multiple (7)
- Delay (ms):** 3000 (8)
- Parent Selectors:** _root, company
- Buttons:** Save selector (12), Cancel

Annotations:

- 9: Red box around the "星际英语" (Star English) result.
- 10: Red box around the "袋鼠英语" (Kangaroo English) result.
- 11: Red box around the "Done selecting!" button.
- Red arrow pointing from the "Click selector" field to the "Click type" field with the text "看下一张图片" (Look at the next picture).

设置Selector

The screenshot displays the Web Scraper tool interface. At the top, a website header is visible with a logo and navigation links. A green button labeled "加载更多" (Load more) is highlighted with a red box and labeled 4.2. Below this, a navigation bar contains links like "关于IT桔子", "加入我们", etc., and a subscription form. A blue button labeled "Done selecting!" is highlighted with a red box and labeled 4.3. The bottom section shows the configuration for a "Click selector". The "Click selector" dropdown is set to "Select", which is highlighted with a red box and labeled 4.1. The "Click type" is set to "Click more (click to load more elements. Stops when no new elements with unique text content are found.)". The "Click element uniqueness" is set to "unique CSS Selector". The "Id" field is set to "company", the "Type" is "Element click", and the "Selector" is "a h4".

4.1

设置Selector

添加子选择器，不再赘述

要点解析

Element click也是 Element（结构体）

只是多了一个**鼠标点击加载更多功能**

所以，如果要用它抓取数据，也需要创建一个子选择器
